TT and triathlon	Cervélo P5 and P-Series, Cannondale SuperSlice, Look 796 Monoblade RS, Quick Pro TT:ONE and TR:ONE
Track	Look T20 and AL 464 P

Names worth knowing

- **Pinarello Dogma F** is the flagship race frame. **Dogma X** is the flagship endurance frame.
- **Cervélo**: S5 is aero, R5 is the climbing frame, Soloist is the more affordable racer, P5 and P-Series are for time trial and triathlon.
- **Look**: 795 is aero, 785 is climbing, 765 is endurance or gravel, 796 is time trial.
- Labels like **LAB71**, **RS** and **Team** mark the top carbon grade of that frame.
- **Van Nicholas** frames are titanium. Titanium does not rust, rides smoothly and lasts for decades.

Track frames are different

A track frame is for the velodrome. It has one fixed gear and no brakes. Do not sell one for road use.

Colours

The same frame in a different colour is a separate listing on our site, sometimes at a different price. Confirm the exact colour with the customer and check that colour's stock.

Remember these

- Dogma F is race, Dogma X is endurance.
- Cervélo: S5 aero, R5 climbing, Soloist value racer, P5 and P-Series TT and tri.
- Look: 795 aero, 785 climbing, 765 endurance and gravel, 796 TT.
- Track frames have a fixed gear and no brakes. Not for the road.
