RUNNING THE STORE · 5 MIN READ

The Dialer app on the store phone

The D Byk Dialer is the phone app on each store's phone. It replaces the normal dialer so that every call is logged and linked to the CRM without anyone typing it in later.

What it records by itself

Every call on the store phone: the number, the time, how long it lasted, and whether it was incoming, outgoing, missed or rejected.

What you add after a call

- **Outcome**: Still interested, Visiting store, Bought, Lost or Not reachable.
- **Note**: what the customer wants, in one or two lines.
- **Follow-up**: when to call again.

This takes a few seconds and it is what links the call to the customer's inquiry in the CRM. A call with no outcome tells the next person nothing.

Calls that are not leads

Vendors, couriers, staff, personal calls and spam should not become inquiries. Tag the number once as Vendor, Staff, Personal, Spam or Ignore, and its calls stay out of the CRM from then on. Tag honestly. A customer number tagged Ignore disappears from follow-up.

Missed calls

A missed call is a customer who wanted to buy or book something and could not reach us. Call back as soon as you are free. During working hours, a missed call that is not returned is escalated to the owners.

Sending a lead to another store

If the customer is nearer to another store, or the bike is there, hand the lead off in the app with a note. The other store sees it and takes over the conversation. Tell the customer which store will call.

Message templates

Ready messages save typing: Missed your call, Will call back, Thanks for calling, and Bike ready. Outside working hours the phone can send an after-hours message so the caller knows when we open.

Three rules

- Use the store phone for customer calls, so the call is logged.
- Set an outcome after every customer call.
- Return every missed call the same day.

Remember these

- The app logs every call. You add outcome, note and follow-up.
- Tag vendors, staff, personal and spam numbers so they stay out of the CRM.
- Unreturned missed calls in working hours escalate to the owners.
- Hand a lead to another store in the app, with a note.
