Reading MTB names and matching the rider

Trek

FAMILY	WHAT IT IS	LISTED FROM
Marlin 4	Aluminium hardtail for new riders. A higher number brings a better fork, drivetrain and brakes.	₹44,399
Marlin 5		₹58,199
Marlin 6		₹72,199
Procaliber	XC race hardtail. Procaliber 8 is aluminium, 9.6 is carbon.	₹1,59,199
Supercaliber	XC race full suspension. The rear shock, called IsoStrut, is built into the top tube.	₹4,14,899

Trek MTB rule: a single number like 8 is aluminium. A number starting with **9.** is carbon.

Merida Big Nine

- Aluminium range climbs 60, 100, 300, 400. Higher number, better parts.
- **TR** models have a longer 120 mm fork and more relaxed geometry for trail riding.
- **One-Twenty** is Merida's full-suspension trail bike.

Polygon

- **Cascade** and **Premier**: entry hardtails.
- **Xtrada**: the trail-ready hardtail.
- **Siskiu D** and **Siskiu T**: full suspension, D for cross-country, T for trail.
- **Collosus**: the long-travel bikes.

Prices are our website listings in November 2026. They change, so check the site before you quote.

Five questions to ask

- Where will you ride: city, fire roads, or proper trails?
- How often, and how far?
- Have you ridden trails before?
- What is your height? (Sets the frame size.)
- What is the budget, including helmet and gloves?

Set expectations honestly

An entry hardtail with a coil fork is good for fire roads and easy trails. It is not built for jumps and drops. Say so at the time of sale. For children we have 24 inch bikes: Trek Precaliber 24 and Polygon Cascade 24.

Remember these

- Trek MTB: 9.x means carbon. Marlin is the entry hardtail.
- Supercaliber is full suspension with the IsoStrut shock in the top tube.
- Merida TR means a 120 mm fork and trail geometry.
- Polygon: Cascade and Premier entry, Xtrada trail hardtail, Siskiu full suspension.
